

Pavo BiotinForte

For strong and elastic hooves

You can only support brittle or crumbly hooves in one way - from the inside out! To achieve the best result, give your horse Pavo BiotinForte for a period of at least 4 months. In addition to healthy hooves, the coat will also become shiny and healthy in appearance. Alongside a high concentration of biotin, Pavo BiotinForte contains all basic elements for healthy hooves and coat such as amino acids, lecithin, copper, zinc and manganese. Pavo BiotinForte is therefore a complete supplement for the care of your horse's hooves.

Watch a [film](#) about Pavo supplements.

Important characteristics
