

Pavo Condition

For recreation and light sport

Pavo Condition is the most widely used product in the Pavo range. If you have a new horse and don't know exactly what it needs, or you're starting to train a young horse, Pavo Condition is a good choice. Its low protein content puts minimal stress on the kidneys and it is oat-free. The extra biotin ensures healthy hooves and a shiny coat. The raw materials are expanded to make the energy more available. This encourages digestion and a healthy intestinal tract.

Important characteristics

- Very low protein content, so low load on kidneys
- Oats free
- Fully balanced vitamins that supply the daily requirement
- Extra biotin for strong hooves and a healthy coat

Application

Pavo Condition is suitable for horses and ponies used for recreation and pony/riding club activities, horses that don't require a lot of energy or horses that get 'hot' when fed oats.

Contains

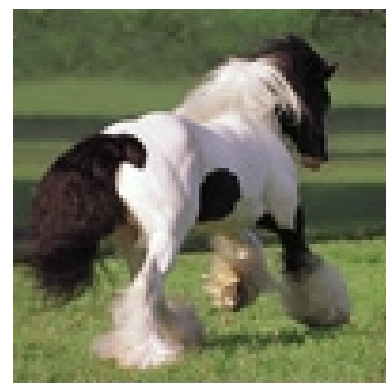

Barley
Semolina
Wheat
Soy Peel
Lucerne
Linseed
Palm oil
Cane Molasses
Vitamin - minerals

Guaranteed yields

DE	12,3 MJ/kg
