

Pavo E'lyte

Electrolyte mix for sport horses

When your horse sweats heavily it loses, alongside fluid, a lot of important body salts such as calcium, sodium, potassium and chlorine. With a shortage of electrolytes, your horse can retain less fluid, the elasticity of the skin diminishes and its staying power reduces. Pavo E'lyte, given before exercise, enables your horse to build up a reserve of fluid and electrolytes. Optimal electrolyte levels are maintained longer during and after the exercise period, the lactic acid in the muscles is more quickly neutralized and the blood iron level is also more rapidly restored.

Watch a [film](#) about Pavo supplements.

Important characteristics

- Before and after intensive performance
- In high temperatures
- When sweating heavily

Application

- Sport horses that sweat heavily - particularly in eventing, endurance, driving, dressage, jumping and racing

Contains

Lucerne
Sodium chloride
Wheat middlings
Dextrose
Magnesiumacetate
Potassium Chloride
Vegetable oil

Guaranteed yields

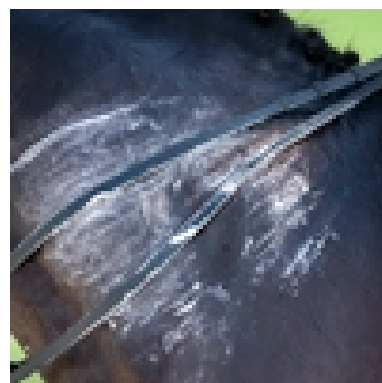

Energy (EWP _a)	0,45 Unit/ kg
Crude protein	8 %
Crude fat	1 %
Crude fibre	14 %
Crude minerals	32 %
Sugar	7 %
Starch	5 %
Chloride	14,0 %
Dextrose	6,0 %

Minerals and trace elements (per kg)

Calcium	0,7 %
Phosphorus	0,3 %
Sodium	9 %
Potassium	4 %
Magnesium	1 %

Vitamin levels (per kg)

Vitamin C	4.000 mg
-----------	----------

Package

Sacking

3 kg

Durability

Durability

18 mth

Feeding advice

GRAM PER DAY

HORSE (600 KG)

PONY (300KG)

Storage advise

Store in a cool, dry and dark place. Reclose after usage
