

Pavo Liga

The concentrate for Icelandic horses and other

Breeds of horses that are good doers require relatively little compound feed, but do have a high vitamin and mineral demand. Pavo Liga has been developed especially for these breeds. These extremely tasty pellets developed especially for good doers, will give your horse all the support it needs for good general health, a shiny coat and strong hooves. And all that with a low energy hard feed ration!

Important characteristics

- Very low protein content
- Twice the amount of vitamins and minerals per kilo hard feed
- Low energy value
- Extra copper, zinc, selenium and biotin.

Application

- Especially for easy keepers which require only low calorific intake
- Provides the necessary vitamins and minerals in a minimal amount of feed

Contains

Barley
