

Pavo Mobility

For supple joints

In order to move correctly, it is important that the joints function correctly. Cartilage, synovial fluid and ligaments are together responsible for the control of the movements. Disruptions in the joints such as inflammations, growth of cartilage or wear and tear are often painful and prevent correct movement. This can result in stiffness, loss of willingness to work and injuries. The unique combination of Colatech® collagen with a glucosamine complex and chondroitin in Pavo Mobility assist the correct working of your horse's joints.

Watch a [film](#) about Pavo supplements.

Important characteristics

- Promotes the creation of synovial fluid
- With Colatech®, glucosamine complex and Chondroitin
- Supports the strengthening of tendons and ligaments

Application

- Veteran horses (over 16 years of age)
- Horses with tendon and joint problems
- Sport horses
- Young horses that are just beginning training
- Foals that are prone to joint problems

Contains

Lucerne

Collagen (Enzymatically hydrolysed collagen)

glucosamine sulfate

Wheat middlings

Chondriotine sulfate

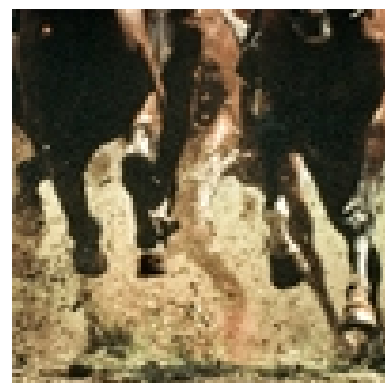

Dextrose

Hyaluronic acid

Vegetable oil

Guaranteed yields

DE	9,9 MJ/kg
Energy (EWP _a)	0,7 Unit/ kg
Crude protein	27 %
Crude fat	1 %
Crude fibre	17 %
Crude minerals	7 %
Sugar	3 %
Starch	5 %
glucosamine sulfate	75 mg/kg
Starch	46 %
Chondriotine sulfate	50 g/kg
Hyaluronic acid	1250 mg/kg
Collagen (Enzymatically hydrolysed collagen)	125 g/kg

Minerals and trace elements (per kg)

Calcium	0,7 %
Phosphorus	0,3 %
Sodium	0,2 %
